# Empower genuine international applicants and their financial sponsors to authenticate their bank data, to ultimately improve efficiency and integrity.

Funds Validator (FundsV) serves as a conduit for authentic bank-generated data – modernizing the due diligence phase for globally-minded students, counselors, host campuses, governments and other stakeholders.

Paper Bank Statements

1. Replace requests to upload easily-manipulated bank statements.
2. Minimize duplicate data entry with unique, secure URLs.
3. Authenticate bank data, with account holders' permission.
4. Consolidate account balances. Detect anomalies.
5. Review verified data.

Features

- Choose full API integration or stand-alone option
- Enhance privacy by segregating data
- Secure financial data via end-to-end encryption
- Receive results within minutes
- Confirm the data via QR Code
